## CHOOSE LOW MIGRATION INKS

During the LabelExpo2011, taking place from 28 September to 1 October 2011 on Brussels Expo grounds Jänecke+Schneemann Druckfarben GmbH will show their latest inks series specially designed for label printing.

■ **JÄNECKE+SCHNEEMANN DRUCKFARBEN GMBH LABELEXPO 2011**

# Safety in Printing Foodstuffs Labels

During the LabelExpo2011, taking place from 28 September to 1 October 2011 on Brussels Expo grounds, Jänecke+Schneemann Druckfarben GmbH will show their latest inks series specially designed for label printing. According to the motto „Choose Low Migration Inks“, emphasis is put on the production of food labels and packaging. Requirements and demands of brand manufacturers in regard to conformity with foodstuffs and hygienic standards (BRC standard) have been intensified in the past few months. Industry demands from the printers' shops the strict adherence to the measurements. In order to fulfil the demands and regulations, many well-known label printers are now using consumables (printing ink, cleaners, varnishes) which are in compliance with low-migration printing conditions.

Jänecke+Schneemann are fully aware of this demand and have

developed specially optimized, low-migration ink systems. Their product lines UV Supraflex LMI, Supra UV Offset LMI and Impact LMI have been classified in their own labs and by independent institutes. They are also in conformity with the EuPIA regulation 1935/2004, the Swiss "Bedarfsgegenständeverordnung" (utensil regulation) SR 817.023.21 and the current Nestlé Guidance Note. The general trend to maximise the process security requires coordinated production processes and the use of specific consumables.

### Exchange with Experts

At their booth, experts from different departments of Jänecke+Schneemann Druckfarben will be supporting you if you have questions regarding topics like „migration“ and „process security“. Furthermore, the manufacturer of

printing inks offers product innovations from UV, UV-Flexo, Offset and Flexo for printing on foodstuff labels and packaging. All relevant information regarding innovations and further developments will be first-hand available at the J+S booth.

### Advantages of J+S LMI Ink systems

- Specially low migration and low odour- highest security in the printing process
- Specially suitable for labels and food packaging which are sensitive to odour and taste
- Excellent printability
- Maximum cost-effectiveness
- Self-contained analytical lab – Due to regular quality controls and migration analysis most effective security according to current standards is achieved.

UV Supraflex - kationisch härtend

Bedruckstoff Substrate	Artikelnummer Item number	Eigenschaften Properties	Nutzen Use
Polyamidfolien Polyamidfoil	390420 - 423 Supraflex CAT Supraflex CAT	<ul style="list-style-type: none"> <li>Geruchsarm</li> <li>low oder</li> <li>Kochfest</li> <li>boil proof</li> <li>Hohe Farbintensität</li> <li>high color intensity</li> <li>Produkte: Wurst- und Käsehüllen</li> <li>sausages casings</li> </ul>	<ul style="list-style-type: none"> <li>Produktsicherheit von der Lagerung bis zum Endkunden</li> <li>Product safety throughout the supply chain</li> </ul>

**NEW FACES IN BUSINESS**

# Edge through our expertise

**New Sales & Marketing Manager**

New face at Janecke + Schneemann. Since 1st of June, Henning Harfst is the new Sales & Marketing Manager for all global operations at J + S. The 37-year-old Harfst is an expert in this field. He is married, has a degree in economics and held various positions in his career in marketing and sales in the industrial sector. Most recently he was responsible as head of sales for Europe in the laminates division of an international group.

"The first two weeks at J + S were very exciting. There is certainly a lot to do. However, the professionalism with which we are developing our company to face the challenges of the future is impressive. In addition, I got to know a very motivated and competent team. This combination makes me look positively into the future," said Harfst in his initial remarks after two weeks.

**New Sales & Marketing Manager**

**Henning Harfst**

**New Operation Manager of UV Production**

As the new Operation Manager of the UV production I am looking forward to supporting J + S.

During my formation as a flexographic printer I got to know the handling of all kinds of inks on the UV Flexo field. As a result of my intensive training I gained experience with all kinds of printing machines, i.e. from the purely mechanical one-colour series-production printer to the ultra-modern eight-colour flexo printing presses. After my apprenticeship I became a technologist for printing and digital media and was promoted production supervisor in the company.

**New Operation Manager of UV Production**

**Alexander Jänecke**

**Export Department**

After my studies in languages and commerce I worked mainly in the export department of well-known companies. After longer stays abroad, e.g. in the United States of America and Spain, I made up my mind to return to Germany. My decision to work for Jänecke+Schneemann was taken easily. Due to the fact that Jänecke+Schneemann is exporting to more than 100 countries I have the possibility to use my knowledge of the English, French and Spanish language daily with our customers. An additional plus factor is the interesting product portfolio which is enlarged permanently and which poses a new challenge daily. I joined the export team of Jänecke+Schneemann in November 2010.
